Education

University of Dhaka

Bachelor of Science in Computer Science and Engineering

January 2019 – January 2024

CGPA: 3.58/4.00

Technical Skills

Languages: C++, Python, C#, Java

Platforms & Frameworks: PyTorch, NVIDIA Isaac Sim, Unreal Engine, Vulkan, WinUI 3, UWP, React, Django, SDL2

Tools & Databases: Git, Firebase, SQLite

Experience

Samsung Electronics

Software Engineer

February 2024 – Present

Dhaka, Bangladesh

Physical AI Simulator | Python, NVIDIA Isaac Sim, Unreal Engine

Jul 2026 – Present

- **Developing autonomous multi-agent simulations** for embodied AI research, integrating navigation, animation, and walking, sitting, and pick-and-place behaviors in interactive indoor environments.

3D Content Editor | Vulkan, C++

Sep 2025 – Jun 2026

- **Achieved ~30× smaller models in ~7 seconds** with a post-training compression scheme.
- **Addressed a CPU bottleneck** by prototyping parallel key-value sorting with Vulkan compute shaders.
- Implemented parallel linear-assignment sorting in C++, translating an academic algorithm into **production-grade application code**.

Samsung Notes

Feb 2024 – Jun 2026

WinUI 3 / C++ | Mar 2025 – Jun 2026

- **Led the initial C# to C++ migration**, delivering a desktop-facing wrapper over the shared core SDK.
- **Built core editing workflows:** text input, drawings, PDFs, thumbnails and page previews, clipboard, drag-and-drop, rich text/HTML conversion, and Handler/Looper-style message scheduling.

UWP / C# | Feb 2024 – Jun 2026

- **Reduced startup time by 20%** by fixing initialization inefficiencies.
- Prototyped ListView virtualization to render **thousands of items with lower UI memory use**, using viewport-driven population.
- **Prevented data-loss and corruption risks** from simultaneous note access by enforcing single-owner access across the editor lifecycle.

Publications

- **RaPTGS: Render-Agnostic Post-Training Compression of 3D Gaussian Splatting**

2026

Asif Jawad, K. M. Azwad Hossain

European Conference on Computer Vision | Paper

- **UHGMiner: A Framework and Algorithm for High-Utility Hypergraph Mining**

2026

Asif Jawad, Jawad Habib, Md. Tanvir Alam, Md. Fahim Arefin, Chowdhury Farhan Ahmed, Carson K. Leung

International Conference on Advanced Data Mining and Applications

Competitive Programming & Achievements

- **ICPC World Finalist (Honorable Mention)**. Represented the University of Dhaka at the **45th ICPC World Finals**, among ~140 qualifying university teams worldwide. [Profile](#)
- **ICPC Dhaka Regional Champion**. Placed **1st among 1,280 teams** at the ICPC Dhaka Regional to qualify for the World Finals. [Standings](#)
- **Codeforces**. Achieved the **Candidate Master** title on Codeforces, placing in the **top 4% of all users** globally. [Profile](#)
- **Meta Hacker Cup 2024**. Placed **763rd of 22,000+ participants** in Meta's annual global programming competition. [Certificate](#)
- **National-Level Competitions**. Won and placed in multiple national programming and informatics competitions across high school and university.

Awards & Leadership

- **Samsung Icon Award**. Recognized for leading the C# → C++ migration of core components in Samsung Notes. [Award](#)
- **Samsung Code Contest**. Served as the lead judge and problem author for two editions of the annual coding competition.
- **Mentorship**. Mentored team members across multiple years to pass the mandatory Internal Capability Certification. [Certificate](#)

Undergraduate Projects

CryptoWallet | Android Native, Firebase | [GitHub](#)

- Android app for tracking cryptocurrency prices and personal portfolios using REST APIs and Firebase Realtime Database.

Hematosphere (Blood Bank Platform) | React, Django | [Demo](#)

- Full-stack platform matching University of Dhaka blood donors and recipients by blood group, proximity, and availability.
